DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Asahi Chemical Industry Co., Ltd., JP-11-181199, in view of Asahi Chemical Industry Co., Ltd., JP-10-204173, further in view of Ibe et al. 4,788,277.
- 3. Asahi Chemical Industry ('199) discloses applicants' PPE, styrenic polymer and flame-retardant, but as applicants' have pointed it out, the reference is silent about the concentration of the o-cresol. Asahi Chemical Industry ('173) describes the process of making applicants' PPE, but it does not specify the amount of o-cresol either. However, lbe et al. recite a PPE, which has been polymerized in the presence of oxygen and using the same catalysts as applicants', the PPE having superior water resistance and impact resistance, and said PPE may contain about 1% by weight or less of o-cresol. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the PPE of lbe et al., in the composition of Asahi Chemical Industry ('199), in order to take advantage of its excellent properties. The polydispersity is inherent in the process of lbe et al.
